The platform was launched on 08 July 2022 to facilitate seamless access to multiple Government services through a single set of login credentials.

MinPahalaaan enables users to authenticate themselves once and securely access various integrated applications without the need for repeated sign-ins. The platform integrates multiple identity providers such as Aadhar, DigLocker, and e-Prover, thereby ensuring interoperability and a unified user experience.

Users can register on the platform using basic details such as name, date of birth, and mobile number, and may complete verification through eKYC using Aadhar, PAN, Driving License or ARAAR. The platform supports advanced features such as multi-factor authentication, password-less login, and the ability to manage multiple accounts linked to a single mobile number.

The NSSO framework significantly reduces the burden of maintaining multiple credentials, enhances data security, and provides a standardized authentication mechanism for Government services. It also benefits service providers by reducing the cost and complexity of developing independent authentication systems.

MinPahalaaan thus serves as a secure, scalable, and citizen-centric digital identity solution, contributing to the vision of Digital India by improving ease of access to Government-to-Citizen (G2C) services.

Application form registration has been enabled through the single sign on service MinPahalaaan of Ministry of Electronics and Information Technology, for the convenience of the applicants.

Since mentioned above are tentative, and applicants will be informed in case there is any change due to any reason.

The aggregate percentage of the two papers corresponding to the number of slots derived as shall determine the qualifying cut-off for Eligibility for Assistant Professor in 'Economics' for the SC category. Similar yardstick shall be employed for deriving the subject-wise qualifying cut-offs for all categories.

Step V: The total number of slots available for awarding JRF is allocated among different categories as per the reservation policy of Government of India.

It may be noted that, notwithstanding the above, the qualifying criteria as decided by DGC is final and binding. Results of the examination shall be hosted on NTA website: <https://apnnta.nic.in/>. The candidates will not be individually intimated about their result.

^aApplying on the basis of their master's degree or equivalent examination.

2) Normalisation procedure (Appendix - VIII & IX whichever is applicable):

- For multi-shift papers, raw marks obtained by the candidates in different shifts/sessions will be converted to NTA Score (percentage).
- The detailed procedure on NTA Score being adopted is available on NTA website under Normalisation procedure based on Percentage Score.
- In case a subject test is conducted in multi-shifts, NTA Score will be calculated corresponding to the raw marks obtained by a candidate. The calculated NTA Score for the Raw Marks for all the shifts/sessions will be merged for further processing for deriving the allocation.
- In the event of the procedure for the multi-shifts being dissimilar / staggered, the lowest will be the eligibility cut-off for that category for all candidates (i.e. all shifts).

For Example: In the examination held in two shifts, if the 40% marks correspond to a Percentage score of 70 in Shift I and 75 in Shift II, then all these equal to or above 70 percentage (Percentage

score of 100 in TE) in both skills will become eligible in General Category. Similar methods will be adopted for the other categories in determining eligibility cut-offs. In case the examination is held in a greater number of shifts the same principle shall apply.

3) No-Evaluation/No-Checking of result

- There shall be no re-evaluation/no-checking of the result. The independence in this regard shall be maintained.

Any candidate found to have changed room/hall or the computer on their own rather than the one allotted would be liable to cancellation of candidature and no plea in this regard would be considered.
51. The computer terminal allotted to the candidate will display a Welcome login screen. Candidate's photograph and subject opted by the candidate. For login, the candidate will have to enter login-ID and password.
52. After logging in, the candidate shall be able to see the detailed instructions for the examination. Candidates are advised to go through the instructions carefully regarding the type of questions and marking scheme. At the designated time of the start of the examination, the candidate will be able to proceed and see the questions on the computer screen.
- The keyboard attached to the computer, if any, will be disabled during the entire duration of the examination. Depending on the type of question, the answers to questions can either be entered by clicking on the virtual onscreen keyboard (numeric or otherwise) using the computer mouse or by clicking the choice option(s) using the computer mouse.
- Candidates will have the option to change/modify answers already entered anytime during the entire duration of the examination.
- In case the computer mouse allotted to any candidate malfunctions anytime during the test, the candidate will be immediately allotted to another computer system and the time lost due to this will be adjusted in the answer as to give the candidate the full allotted time.
53. The on-screen computer clock counter of every candidate will be set at the server. The countdown timer in the top right side of computer screen will display the time remaining (in minutes) available for the candidate to complete the examination. When the timer reaches zero, the examination will end by itself. Candidate will not be required to end or submit the examination.

A candidate has the option of answering a question and simultaneously placing it under "Marked for Review", these answers will be considered for evaluation. However, if a candidate has simply put "Marked for Review" for a question without answering it, the corresponding question "Marked for Review" without an answer will not be considered for evaluation. It may be noted that a candidate can return to any "Marked for Review" question any time during the examination by clicking on the corresponding question number (are displayed on the Question Palette) of the corresponding section.

To change the answer to a question that has already been answered, first select the corresponding question from the Question Palette, then click on "Clear Response" to clear the previously entered answer and subsequently follow the procedure for answering that type of question.

(iv) Rough Work:

All calculations/working needs to be done only in the rough sheet provided at the Centre in the examination Room Hall and on completion of the test candidate must hand over the rough sheet to the invigilator as they exit the Room Hall.

National Testing Agency (NTA)

Procedure to be adopted for compilation of NTA scores for Multi Session Papers
(Normalization procedure based on Percentile Score)

NTA may conduct examinations on multiple dates, generally in two sessions per day. The candidates will be given different sets of questions per session, and it is quite possible that in spite of all efforts of maintaining equivalence among various question papers, the difficulty level of these question papers administered in different sessions may not be exactly the same. Some of the candidates may end up attempting a relatively tougher set of questions when compared to other sets. The candidates who attempt the comparatively tougher Examination are likely to get lower marks as compared to those who attempt the easier one. In order to overcome such a situation, "Normalization procedure based on Percentile Score" will be used for ensuring that candidates are neither benefited nor disadvantaged due to the difficulty level of the examination. With the objective of ensuring that a candidate's raw mark is identified, and that a level playing field is created in the above context, the Normalization Procedure, as under below shall be adopted, for compiling the NTA scores for multi session papers.

The process of Normalization is an established practice for comparing candidate scores across multi session papers and is similar to those being adopted in other large educational selection tests conducted in India. For normalization across sessions, NTA shall use the percentile equivalent.

Percentile Score: Percentile score is score based on the relative performance of all those who appear for the examination. Basically, the marks obtained are transformed into a scale ranging from 100 to 0 for each session of examination.

The Percentile Score indicates the percentage of candidates that have scored EQUAL TO OR BELOW (same or lower raw score) than particular Percentile in that examination. Therefore, the topper (highest score) of each session will get the same Percentile of 100 which is desirable. The marks obtained in between the highest and lowest scores are also converted to appropriate Percentiles.

The Percentile score will be the Normalized Score for the Examination (instead of the raw marks of the candidate) and shall be used for preparation of the merit list.

The Percentile Score will be calculated up to 7 decimal places to avoid bunching effect and round off.

The Percentile score of a Candidate is calculated as follows:

$$100 \times \frac{\text{Number of candidates appeared in the 'Session' with raw score EQUAL TO OR LESS than the candidate}}{\text{Total number of the candidates appeared in the 'Session'}}$$

राष्ट्रीय परीक्षा एजेंसी National Testing Agency

Confidence in Assessment

Note: The Percentile of the Test shall NOT be an aggregate or average of the Percentile of individual subject. Percentile score is not the same as percentage of marks obtained.

Example: Suppose a test was held in 4 sessions as per details given below:-

(Allocation of Days and shifts were done randomly)

(a) Distribution of candidates were as follows:

Session-1: Day-1, Shift-1, **Session-2:** Day-1, Shift-2, **Session-3:** Day-2, Shift-1 and **Session-4:** Day-2, Shift-2

Session	Day/Shift	% of Candidates			Marks	
		Absent	Appeared	Total	Highest	Lowest
Session - 1	Day - 1, Shift - 1	3574	20012	21918	100	25
Session - 2	Day - 1, Shift - 2	4139	12541	14718	948	18
Session - 3	Day - 2, Shift - 1	6036	41326	47362	331	48
Session - 4	Day - 2, Shift - 2	3074	40600	46677	332	44
Total (Session - 1 to Session - 4)		12273	142412	167712	346	48

In this method of setting the **100% BEST RAW SCORE** in each paper (aggregate of the raw scores) will be the 100 Percentile indicating that 100% of candidates have scores equal to or lesser than the highest score topper for that session.

Highest Raw Score and Percentile Score: All the highest raw scores will have normalized Percentile Score of 100 for their respective session.

Session	Total Candidates Appeared	Highest Raw Score	Candidates who scored EQUAL OR LESS THAN Highest Raw Score	Percentile Score	Remarks
Session-1	20012	100	20012	100.000000 $[(20012/20012) * 100]$	i.e. all the highest raw scores would be normalized to 100 Percentile Score for that respective session.
Session - 1	12541	348	12541	100.000000 $[(12541/12541) * 100]$	
Session - 3	41326	331	41326	100.000000 $[(41326/41326) * 100]$	
Session - 4	40600	332	40600	100.000000 $[(40600/40600) * 100]$	

Lowest Raw Score and Percentile Score: Percentile Score of all the lowest raw scores will depend on the total number of candidates who have taken the Examination for their respective session.

Session	Total Candidates Appeared	Lowest Raw Score	Candidates who scored EQUAL OR LESS THAN Lowest Raw Score	Percentile Score	Remarks
Session -1	20012	-10	1	$\frac{0.0013099}{(1-20012)} * 100$	i.e. Percentile Score of all the lowest raw scores are different i.e. Percentile Score depend on the total number of candidates who have taken the Examination for their respective session.
Session -2	20241	-10	1	$\frac{0.0019730}{(1-20241)} * 100$	
Session -3	41326	-40	1	$\frac{0.0024195}{(1-41326)} * 100$	
Session -4	40900	-44	1	$\frac{0.0024620}{(1-40900)} * 100$	

The following is a further explanation of the interpretation of the raw scores and Percentile Score in Session-3 (Day-2 and Day-1) with 41326 candidates who have taken the examination.

Candidate	Percentile Score	No of Candidates	Raw Score	Remarks
A	$\frac{100.0000000}{(41326-41326)} * 100$	1	320	Indicates that amongst those appeared, 100% have scored either EQUAL TO OR LESS THAN the candidate A (320 raw score). It also indicates that no candidate has scored more than the candidate A (320 raw score).
B	$\frac{99.9224413}{(37044-41326)} * 100$	77	321	Indicates that amongst those appeared, 99.9224413% have scored either EQUAL TO OR LESS THAN the candidate B (321 raw score). It also indicates that remaining candidates have scored more than candidate B (321 raw score).
C	$\frac{99.4646194}{(20001-41326)} * 100$	394	41	Indicates that amongst those appeared, 99.4646194% have scored either EQUAL TO OR LESS THAN the candidate C (41 raw score).

				It also indicates that remaining those appeared have scored more than candidate C (41 raw score)
D	88.7040338 (111024122K) *100]	789	29	Indicates that amongst those appeared, 88.7040338% have scored either EQUAL TO OR LESS THAN the candidate D (29 raw score) It also indicates that remaining candidates have scored more than candidate D (29 raw score)
E	1.1824266 (24564122K)*100]	190	-45	Indicates that amongst those appeared, 1.1824266% have scored either EQUAL TO OR LESS THAN the candidate E (-45 raw score) It also indicates that remaining candidates have scored more than candidate E (-45 raw score)

STEP-BY-STEP PROCEDURE FOR NORMALIZATION AND PREPARATION OF RESULT:

Step-1: Distribution of Examinees in two shifts:

Candidates have to be distributed into two sessions randomly so that each session has approximately equal number of candidates. These two sessions would be as follows:

Session-1: Day-1 Shift-1, Session-2: Day-1 Shift-2

In the event of more number of days or less number of shifts, the candidates will be divided accordingly. This will ensure that there is no bias in the distribution of candidates who shall take the examination. Further, with a large population of examinees spread over the entire country the possibility of such bias becomes remote.

Step-2: Preparation of Results for each Session:

The Examination results for each session would be prepared in the form of

- Raw Scores
- Percentile Score of Total raw scores.

The Percentile would be calculated for each candidate in the Session as follows.

Let TP be the Percentile Score of Total Raw Score of that candidate.

$$\text{Total Percentile (TP):} = 100 \times \frac{\text{No. of candidates appeared from the session with raw score EQUAL TO OR LESS than TP score}}{\text{Total No. of candidates appeared in the session}}$$

Step-3: Completion of NTA score and Preparation of Result:

राष्ट्रीय परीक्षा एजेंसी National Testing Agency

Confidential Assessment

The Percentile scores for the Total Raw Score for all the sessions (Session-1: Day - 1; Shift - 1; Session-2: Day - 1; Shift - 2) as calculated in Step-2 above would be merged and shall be called the NTA score which will then be used for compilation of result and further processing for deciding the allocation.

In the event of the percentiles for the multi-shifts being dissimilar / unequal, the lowest will be the eligibility cut-off for that category for all candidates (i.e. all shifts).

For Example: In the Examination held in two shifts, if the 40% marks correspond to a Percentile score of 73 in Shift 1 and 70 in Shift 2, then all those equal to or above 70 percentile (Percentile score of 100 is 74) in both shifts will become eligible in General Category. Similar method will be adopted for the other categories to determine eligibility cut-offs. In case the Examination is held in more number of shifts the same principle shall apply.

Procedure to be adopted for compilation of NTA score for multi-session Exams
(Normalization procedure based on Percentile and Equi-percentile method)

Need for Normalization

For several subjects, the UGC-NET June 2024 may be conducted in different shifts. Even the question papers for any subject in different shifts are different and it is quite possible that despite all the best possible efforts of maintaining equivalency among various question papers, the difficulty level of these question papers administered in different sessions may not be the same or similar. Some of the candidates might have ended up attempting a relatively tougher set of questions when compared to other sets. The candidates who attempted the comparatively tougher examination are likely to get lower marks as compared to those who attempted the easier set, the scores of the students across shifts are not directly comparable. There is a need for normalizing the marks across shifts to make them amenable to such comparisons.

A Committee headed by a Senior Professor from the Indian Statistical Institute Delhi and comprising of Senior Professors from the Indian Institute of Technology Delhi and the University of Delhi had detailed deliberations to arrive at the methodology.

As per Information Bulletin of UGC-NET June 2024 the raw score of each candidate in each subject will be normalized using the Equi-percentile method. This is done separately for each subject for which the examination is held in multiple shifts.

For each subject for which the examination is held in multiple shifts, the raw scores for each candidate appearing for the subject will be converted into NTA Score (Percentile Score & Normalized Score) in the following three steps.

Step 1: Convert Raw Score into Percentile Score

The percentiles are calculated separately for each shift.

Reverse the numbers of candidates who have appeared in a shift. Denote this number by N .

Sort all the candidates in one shift in decreasing order of their marks.

Note the raw marks for each candidate. Suppose this is denoted by T . Count the number of candidates in that shift whose raw scores are less than or equal to T . Denote this number by n .

The percentile score for this candidate is then calculated as:

$$P = \frac{n}{N} \times 100$$

Illustration:

Suppose that the examination in a certain subject is held in two different shifts, S1 and S2, say. Consider six candidates A, B, C, D, E, and F out of which A, B, and C are from shift S1 and the other three are from shift S2.

Let the raw marks of the six candidates be x_1, x_2, x_3 (shift S1 marks) and y_1, y_2, y_3 (shift S2 marks).

For candidates *A*, *B*, and *C*, the percentiles are calculated using the total marks obtained by candidates appearing in shift II (in the same subject) as explained above.

Similarly, for candidates *D*, *E*, and *F*, the percentiles are calculated using the total marks obtained by candidates appearing in shift I (in the same subject) as explained above.

Let the respective percentiles be denoted by P_A , P_B , P_C , P_D , P_E , and P_F .

The above data is summarised in the following table. The name in red colour indicates that these are the output of this step.

Candidate	Shift II		Candidate	Shift I	
	Raw score	Percentile		Raw score	Percentile
A	X_C	P_A	D	Y_C	P_D
B	X_B	P_B	E	Y_B	P_E
C	X_A	P_C	F	Y_A	P_F

Since the calculation for percentiles in any shift depends only on the data from that shift alone, there is a separate table for each shift.

Step 2: Put the percentiles in the marks sheet for each session in pre-determined form.

The data across all sessions tabulated at the end of every T is consolidated in a single table.

The columns for the shift-wise raw scores should be kept separate.

All the records are then sorted in decreasing order of the percentiles.

Illustration (Continued):

In the illustrative example given above, suppose that the percentiles of the six candidates satisfy:

$$P_E > P_A > P_C > P_F > P_B > P_D$$

Then the collated table would look as given below:

Candidate	Percentile	RawScoreI	RawScoreII
E	P_E	—	Y_C
A	P_A	X_C	—
C&F	$P_C > P_F$	X_B	Y_B
B	P_B	X_A	—
D	P_D	—	Y_A

Candidate *C* from shift II and candidate *F* from shift I have the same percentile. The relevant entries under “Raw Score I” and “Raw Score II” are the actual raw scores X_C and Y_F respectively. This has the obvious interpretation that marks X_C of shift II are equivalent to marks Y_F of shift I.

Candidates *A* and *B*, appearing in shift II, have a blank entry in column “Raw Score I”, as there is no corresponding candidate having exactly the same percentile from shift I. Similarly, Candidates *D* and *E*, appearing in shift I, have a blank entry in column “Raw Score II”, as there is no corresponding candidate having exactly the same percentile from shift II.

- In the remaining part of this Step 1, the blank entries in the row "Raw Score" column are filled up using linear interpolation.
- Consider a second (row) object entry in the column "Raw Score II" is blank. This blank will be replaced by the interpolated score X which is calculated as

$$X = x_1 + \frac{x_2 - x_1}{(P_2 - P_1)} (P - P_1)$$

Where

P is the corresponding entry in the "Percentile" column

x_1 is the first non-blank entry BELOW X , i.e., $x_1 < X$ and there is neither non-blank entry in the column between x_1 and X .

x_2 is the first non-blank entry ABOVE X , i.e., $x_2 > X$ and there is no other non-blank entry in the column between x_2 and X .

P_1 is the entry in the "Percentile" column corresponding to x_1 from the column "Raw Score II".

P_2 is the entry in the "Percentile" column corresponding to x_2 from the column "Raw Score II".

Note that there may be several blank entries between x_1 and x_2 .

All the blank entries in column "Raw Score II" can now be replaced by the interpolated values.

The blank entries in column "Raw Score I" are also replaced using a similar procedure.

Illustration (Continued)

The table in the illustrative example would look like the following, where the asterisk is red indicates the additional output at the end of this step.

Candidate	Percentile	Raw Score I*	Raw Score II*
E	P_E	X_E	Y_E
A	P_A	X_A	Y_A
C&F	$P_C - P_F$	X_C	Y
B	P_B	X_B	Y_B
D	P_D	X_D	Y_D

Step 2: Calculation of the Normalized Score

Now for each subject, there is a score assigned to each percentile value for each session. The Normalized score, Z , corresponding to a percentile value P , is calculated as:

$$Z = \frac{\text{Score of } P \text{ (i.e., } x_i \text{)} - \text{Minimum}}{\text{Range}} = \frac{x_i - x_1}{x_4 - x_1}$$

Where x_1, x_2, \dots, x_4 denote the raw scores corresponding to the percentile P marks of the different sessions.

Illustration (Continued):

The Raw table in the illustration example would be as follows:

Candidate	Percentile	Raw Score1	Raw Score2	Normalized Score
E	PE	XE	YE	$(XE + yE)/2$
A	PA	XA	YA	$(xA + yA)/2$
C&F	PC-PF	XC	YF	$(XC + yF)/2$
B	PB	XB	YB	$(xB + yB)/2$
D	PD	XD	YD	$(XD + yD)/2$

Step-by-Step Procedure for Converting from Raw Score to Normalized Score: -

Example: Suppose a test was held in 4 phases of examination as per details given below: (Allocation of Days and shifts were done randomly)

Session	Day	Shift	No. of Candidates			Raw Score

Session-1	3312	43	0	$\frac{0}{3166} \times 100$ 0.000000000	i.e., the Percentile Score of all the lowest scores are nil (0). Percentile Score depends on the total number of candidates who have taken the examination in their respective session.
Session-2	3241	56	0	$\frac{0}{3370} \times 100$ 0.000000000	
Session-3	4126	26	0	$\frac{0}{4742} \times 100$ 0.000000000	
Session-4	4602	42	0	$\frac{0}{4677} \times 100$ 0.000000000	

Step 1: Convert Raw Score into Percentile Score

The percentile score for this candidate is then calculated as:

No. of Candidates appeared from the session

Percentile Score = $100 \times \frac{\text{with raw score EQUAL TO OR LESS THAN T Score}}{\text{Total No. of Candidates who appeared in the session}}$

Confidential Assessment

The above marked is based on the work: "Normalization of marks in multi-session examinations", Abbey G. Khan et al. CURRENT SCIENCE, Vol. 118, No. 1, 10 January 2020

Note: The NTA is planning to do the UGC-NET June 2020 examination in a single shift for each discipline/subject/General Test, so that the need for Normalization will not arise. However, under unavoidable circumstances, if any subject is conducted in multiple shifts, then normalization will be done. The performance of every candidate will be evaluated using the equi-percentile method whereas normalized marks of each candidate will be calculated using the percentile of each group of students in a given shift across multiple days for the same subject.
